

Are you looking to advance your career, and would you welcome the opportunity to work in the United States at ID Plastics, LP in Auburn, Alabama? ID Plastics, LP is German engineering produced in the U.S.A. The company specializes in state-of-the-art, customer-oriented manufacturing in the fields of thermoforming and further processing for special plastic parts and panels. These products are primarily used in the railway, aviation and automotive industries, and in collapsible sleeve pack systems. We are offering you the opportunity to make practical use of your skills, knowledge and experience in the post of

## Site Manager

### The opportunity for you

- Responsibility for leading, organizing and developing the site in Auburn
- Safeguarding the profitability of the site, with due regard to sales planning and defined KPIs
- Developing an appropriate and robust organizational structure, leading the staff at the site (approx. 25 employees) and overseeing the continuous professional development of staff
- Drawing up annual investment and sales plans, and devising and implementing suitable measures in the event of deviations
- Optimizing the procurement, sales, warehousing, logistics, production, scheduling and administration departments on an ongoing basis
- Reporting regularly to the executive management, and representing the company in local committees and organizations

### What you will offer

- Extensive professional and leadership experience of independently managing a site or a profit center or unit with cost responsibilities, ideally in the plastics industry
- Sound business, judgement, combined with an analytical mindset and an enterprising approach
- A leadership personality with the ability to actively promote a team spirit and ensure the continuous professional development of staff
- Diplomatic flair and a respectful, appreciative communication style when initiating and implementing changes

### What you can expect

- A permanent position with appropriate freedom and performance-based pay with a range of special benefits
- Customized continuing training opportunities for your personal and professional development
- Pleasant working environment as part of a dynamic, cooperative and motivated team
- Competitive, high-quality products and services
